

I am writing in regards to the LPFM expansion that would take precedent over the FM translator service. I currently listen to KLOVE radio on a FM translator and recently within the past few years several local Christian stations have changed formats and no longer provide this music format in my community. If the LPFM station was to take priority over this translator service it would almost totally remove any such programming from our area. This station serves our community through promoting positive family safe radio that needs no 7 second delay and is safe to have on at any time with my children in the car. The service that KLOVE provides to our community is limitless with providing quality radio programming as well as local advertisements to family activities for free that would not otherwise be publicized without incurring great financial burden upon them. I would ask that you please not proceed with this proposal and that you not take away this shining star (106.7 out of Semora, NC) on my radio dial.

Thank You,  
Tommy Long
